**INTRODUCTION
AND
DETAILS OF PACKAGE CONTENTS**

INTRODUCTION

The Australian Bureau of Statistics developed the Australian Municipal Information System (AMIS) to service certain information requirements of the Australian, State and Local governments and other users of small area statistics. The service provides a range of socio-economic data in time series form.

The areas covered by AMIS are:

- a Statistical Local Government Areas (SLGA);
- b Legal Local Government Areas (LLGA) not already covered as SLGA's;
- c Statistical Divisions;
- d States.

The area coding used in AMIS is based on the Standard Area Code (SAC) used for the Economic Censuses and Surveys and for some other ABS collections. As not all collections use SAC, it has been necessary to convert a number of other area coding systems to SAC in order to have consistency across the data included in AMIS. (For a listing of the concordance between SAC and local government areas see Table 3).

Data included in AMIS is "time series" ie data for a particular series are shown for consecutive periods be they months, quarters or years. On AMIS, the Tourist Accommodation and Building series are quarterly, Population Census series are five yearly and all other series, except Retail Census, are annual. Retail data are published only after each retail census. The last retail census was held in respect of 1979-80.

This release completely replaces previous releases as all data are on a time series basis and are therefore updated and extended.

There has been a major change to the coverage of Tourism data included in AMIS. Confidentiality constraints have resulted in a very fragmented coverage of this data at the LGA level. It has, therefore, been decided that Statistical Division is the lowest level at which Tourism information will be included in AMIS.

Vitals data has also undergone a reduction in content. The age by sex breakdown for deaths figures has been deleted because of confidentiality constraints.

The Building data, previously published as Group 62 has now been split into two groups; 62 Building Approvals and 63 Building Activities.

For all data groups, efforts have been made in this release to "fill" gaps in data series to allow for continuity over time periods.

Users are advised to exercise caution when deriving totals by summing components of data groups. Within some data groups there will be a discrepancy between the published total and the sum of the components. Generally this is due to the exclusion of confidential components. Those data groups affected are identified in Table 1, Index to Series.

CONTENTS OF DATA FILE

- Population Census data, including Labour Force and Housing characteristics
- Demographic Vitals data
- Manufacturing data, including Australian Standard Industrial Classification (ASIC) subdivision data
- Retail Census data
- Agricultural Census data
- Local Government Finance data, from the Standardised Local Government Finance Statistics (SLGFS) Collection
- Finance data from previous AMIS releases (1967-68 to 1980-81)
- Tourist Accommodation data
- Building data
- Miscellaneous data (including Population Estimates, Road Lengths and Area of LGA).

COMPARABILITY OF DATA

Not all cells on the file are directly comparable. This occurs because:

- 1 The definition of a "year" for statistical/accountancy purposes may differ between states; NSW finance data is on a calendar year basis; Victoria's data year ends 30 September, all other states' and the Commonwealth's data year ends 30 June.
- 2 Data for some LGA's are received late and may not be included in a particular release.
- 3 Figures are not available for some items at the time of an AMIS release eg retail data are collected at irregular censuses, the last one being 1979-80.
- 4 Differences occur in the geographic classifications used by the various collections contributing to AMIS.

MAJOR LOCAL GOVERNMENT AREA CHANGES

The number of LGA's varies from time to time due to amalgamations and the growth of urban centres and subsequent re-alignment of LGA's. The nature of such changes are detailed in Table 4 - Boundary Changes - in this manual for those cases involving at least 100 persons.

DETAILS OF AMIS DISSEMINATION PACKAGE

The AMIS package consists of this manual together with the data on microfiche and optionally the data on magnetic tape.

When amendments to the manual occur, replacement pages will be issued. A vertical line on the left hand side of a replacement page is used to indicate text which has been changed.

DETAILS OF PACKAGE CONTENTS

The AMIS package consists of this manual together with the dataset on microfiche and optionally the dataset on magnetic tape.

When amendments to the manual occur new pages will be issued with a vertical line on the left hand side of the page indicating exactly where the changes have occurred.

SECTIONS IN THIS MANUAL

Table 1 - Index of Series

This table provides a list of the series included in AMIS in the same order as they appear on the magnetic tape and microfiche. Also included is the periodicity, and start and end dates of each series.

Table 2 - Explanatory Notes

This section consists of a general description of the data groups and, where practicable, of each series within each group. Also included are details of changes in definitions, or breaks in continuity etc.

Table 3 - Description of Area Classifications and ABS Code Lists

This table provides definitions of the areas used in AMIS and a description of the area coding used. Also included are lists of SLGA's in alphabetical order, grouped into the statistical divisions to which they relate and lists of SLGA's against which are shown a number of relevant area coding systems which have been converted to SAC's for AMIS purposes.

Table 4 - Boundary Changes

This table lists, for each state, the major boundary changes (those involving at least 100 persons) for legal local government areas since 1.7.1967 and also changes of name that have occurred during that period irrespective of whether there have been concurrent boundary changes or not.

ABBREVIATIONS

This section provides a list of the abbreviations used throughout this manual.

ADDS	Agricultural Data Dissemination Service
AMIS	Australian Municipal Information System
ASIC	Australian Standard Industrial Classification
LGA	Local Government Area
LLGA	Legal Local Government Area
NEI	Not Elsewhere included
SAC	Standard Area Code
SLGA	Statistical Local Government Area
SLGFS	Standardised Local Government Finance Statistics

MICROFICHE STRUCTURE AND FORMAT

Each microfiche contains 270 frames, each frame having 60 lines of 132 characters of information. The data is arranged in SAC order, the data for each area spanning a variable number of frames. Data for a particular area may appear on 2 microfiche ie part of the data at the end of one fiche and the remainder of the data at the start of the next.

Information provided in the heading of each frame is as follows:

- i the first line gives the date of production of the fiche
- ii the third line gives the area name
- iii the fourth line gives the SAC.

The data appears chronologically across and down each frame. The first four digits of the period code are the year and the last two the specific period (00 for annual data 01, 02, 03, 04 for quarterly data). Five periods of data are shown across each page.

TAPE STRUCTURE AND FORMAT

The AMIS data tape file consists of many LGA x DATA GROUP x DATE records. Each record contains a number of data items associated with the particular DATA GROUP. The number of data items may vary from one DATA GROUP to another.

Record Structure

Each data record consists of a fixed length header and a variable length data section. In COBOL terms the record structure is as follows:

```

01  AMIS-RECORD
    03  RECORD-HEADER.
        05  RECORD-LENGTH          PIC  9(04).
        05  RECORD-KEY.
            07  LGA                 PIC  x(06).
            07  DATA-GROUP           PIC  9(02).
            07  DATE.
                09  YEAR              PIC  9(02).
                09  PERIOD             PIC  9(02).
        05  NUMBER-OF-DATA-ITEMS   PIC  9(04).
    03  DATA-ITEMS
        OCCURS 1 TO 100 TIMES
        DEPENDING ON NUMBER-OF-DATA-ITEMS.
        05  DATA-SIGN            PIC  x(01).
            88  VALUE-NEGATIVE     VALUE '-'.
        05  ITEM-VALUE           PIC  9(11).

```

The record variables are described as follows:

RECORD-LENGTH	- the length of the record in characters
LGA	- LGA code (SAC)
DATA-GROUP	- DATA GROUP number (see Table 1)
YEAR	- Year of data in record
PERIOD	- Period of data in YEAR
NUMBER-OF-DATA-ITEMS	- Number of data items for DATA-GROUP
DATA-SIGN	- Data sign to be associated with ITEM-VALUE
ITEM-VALUE	- Absolute value of the data item

Physical Structure

The AMIS data tape consists of blocked data records plus optional file header blocks. The data block size may vary from 32 to 4000 characters. The data record size may vary from 32 to 1220 characters. Data records are not split across block boundaries.

Tape Format

The standard tape characteristics provided for this service are:

9-track, phase encoded, 63RPmm, ASCII code-set, ANSI label.

In addition the following tape characteristics are available on request

9-track, phase encoded, 63RPmm, EBCDIC code-set, ANSI label

9-track, phase encoded, 63RPmm, ASCII code-set, unlabelled

9-track, phase encoded, 63RPmm, EBCDIC code-set, unlabelled

9-track, NRZI, 32RPmm, EBCDIC code-set, unlabelled

9-track, NRZI, 32RPmm, ASCII code-set, unlabelled

7-track, NRZI, 32RPmm, external 6-bit code-set, unlabelled.

TABLE 1
INDEX OF SERIES

TABLE 1 - INDEX OF SERIES

This table provides a list of the series included in AMIS in the same order that they appear on the dataset. Also included is the periodicity, and start and end dates of each series.

Unless indicated otherwise data is provided for SLGA's, LLGA's that are not equivalent to SLGA's, Statistical Divisions and States.

POPULATION CHARACTERISTICS

Data is included for both 1976 and 1981 Censuses where possible.

1981 CENSUS OF POPULATION AND HOUSING

The 1981 Census of Population and Housing aimed at counting every person who spent census night (30 June 1981) in Australia, including persons on vessels in or between Australian ports, or on board long-distance trains, buses or aircraft. All dwellings were counted, whether occupied or unoccupied. People were counted where they were on census night, which may not be where they usually lived. Visitors to Australia were enumerated regardless of how long ago they had arrived or how long they planned to stay. Australian residents out of the country on census night were excluded from the count.

Diplomatic personnel and their families are, by definition, out of the scope of the census, as are diplomatic residences.

Most output from the census counts persons where they spent census night. The tables produced in AMIS are on this basis. Output is also available from the ABS which count persons in the geographic area (SLGA's being the smallest) where they usually reside.

Refer to Catalogue of 1981 Census Tables Final Edition (2139.0) for more information.

DESCRIPTION OF DATA ITEMS

CENSUS COUNTS

Census counts have been compiled from the 1961 and 1966 Censuses using 1966 LGA boundaries, from the 1971 and 1976 Censuses using 1976 LGA boundaries and from the 1976 and 1981 Censuses using 1981 LGA boundaries. As well, persons data from the 1981 Census have been grouped by age and sex and recorded using 1981 LGA boundaries.

LANGUAGE (1981 CENSUS ONLY)

The aim of question 15 on the 1981 Census schedule was to determine levels of proficiency in English of those persons who speak a language other than English at home.

The information collected from responses to this question is intended as a broad indication of the potential demand for English language tuition.

Testing prior to the census compared responses to the question with assessments of language proficiency for a sample of respondents interviewed for the purpose. These results showed that those who responded 'not well' or 'not at all' were correctly identified as prospective 'clients' for English language tuition. However, some who responded 'well' or 'very well' did not rate highly in the interview assessment. Responses to the 1981 Census question therefore may underestimate the number of people who were not proficient in English.

Refer to Census 81 - Language (2152.0) for more information.

LABOUR FORCE

For the 1981 Census, the labour force was defined as persons aged 15 years and over who were either:

a employed, that is

i worked for wages, salary, payment or profit during the week prior to census night or helped without pay in a family business for more than 15 hours; or

ii had a job from which they were temporarily absent because they were on recreation leave, sick, on strike, temporarily stood down, etc during the week prior to census night;

or were

b unemployed, that is, did not work and did not have a job but were actively looking for work during the week prior to census night.

Helpers in a family business not receiving wages or salary, and who worked less than 15 hours in the week prior to census night, were not included in the labour force.

INDIVIDUAL INCOME

Individual income is obtained directly from a self-coding question on the census schedule. The non-response rate for the 1981 Census income question is 5.6 percent. The Census Content Check conducted immediately after the 1976 Census showed that most non-respondents were low income earners. It also showed that a significant proportion of people reported their net income, instead of gross income as asked for. While a similar check was not made after the 1981 Census, it is expected that the 1981 Census income data will contain the same kinds of errors as the 1976 Census income data.

Refer to Census 81 - Income (2151.0) for more information.

OCCUPATION

An occupation is defined as a collection of jobs sufficiently similar in their main tasks to be grouped under a common title for classification purposes. In other words, an occupation classification relates basically to the kind of work performed.

The classification of a person's occupation from responses to the Census question is difficult because one kind of work can be described in different ways and, conversely, many different kinds of work can be described by a single name.

Only employed members of the labour force have been classified by occupation.

Refer to Census 81 - Occupation (2148.0) for more information.

INDUSTRY

The allocation of an industry class to an establishment (work location) is a statement about the main kind of economic activity understood to be carried out there. An establishment can be a farm, a factory, a shop, a mine, or any other place where some kind of economic activity is performed, ie a product produced or a service rendered.

The industry classification system used by the ABS (and used in industry coding for the 1981 Census) was the Australian Standard Industrial Classification (ASIC), 1978 Edition.

According to the ASIC rules, each establishment is classified to a particular industry class. This industry class accords with the main activity of the establishment.

The industry of employment of an employed person is the industry class appropriate to the establishment at which he or she works. There is not, however, any necessary relationship between the occupation of individuals and the industry in which they work; for example, a van driver for an establishment designated as in the insurance industry is employed in that industry, not in the transport industry.

Only employed members of the labour force have been classified by the industry of the employer.

Refer to Census 81 - Industry (2147.0) for more information.

MODE OF TRAVEL TO WORK

This question asked how each person with a job travelled to work on the Monday before the census (ie 29 June 1981). Some modes of transport may appear in unexpected places, eg tram or ferry in the ACT. This is possible as a person may have been working away from the usual location on the day before census day.

DWELLING CHARACTERISTICS

For Census purposes, dwellings are classified into two groups: occupied and unoccupied. An occupied private dwelling is defined as the premises occupied by a household on census night. A private dwelling is normally a house, flat, part of a house or even a room but can also be a tent, houseboat, or a caravan if standing on its own block of land and not occupied by members of the same household resident in an adjacent dwelling. The total number of dwellings may be more than the total number of known structures in any given area.

NATURE OF OCCUPANCY

This characteristic can relate only to occupied private dwellings. It combines information on whether a dwelling is owned (subject to mortgage or otherwise) or is rented.

RENT - AMOUNT PAID (1981 CENSUS ONLY)

This characteristic relates only to rented occupied private dwellings.

MORTGAGE PAYMENTS - TOTAL

This characteristic relates only to occupied private dwellings being purchased by any usual member of the household within such a dwelling.

Because of price and income changes between censuses, caution must be exercised when making any intercensal comparisons of this item.

VITALS

Vital statistics for States and Territories are compiled on two bases;

i in respect of the State or Territory where the registration of the birth or death took place and

ii in respect of the usual residence of the mother or of the deceased.

A birth may take place in a State other than the State in which the mother usually resides, particularly in an area near a State border. Similarly, a death may occur in a State other than the State in which the person usually resides particularly in an area near a State border. The Vitals data in AMIS is presented on the usual residence basis. Births and deaths which took place outside Australia are excluded from the statistics.

Refer to Births, Australia (3301.0) and Deaths, Australia (3302.0) for more information.

DESCRIPTION OF DATA ITEMS**BIRTHS**

There is usually an interval between the occurrence and registration of a birth and, as a result of delay in registration, some births occurring in one year are not registered until the following year or even later. However 98 percent of all births are usually registered within 3 months of occurrence.

Figures for births do not include foetal deaths (stillbirths).

DEATHS

There is usually an interval between the occurrence and registration of a death, and as a result of delay in registration, some deaths occurring in one year are not registered until the following year or even later. However 99 percent of all deaths are usually registered within 6 months of occurrence.

Figures for deaths do not include foetal deaths.

MANUFACTURING

CENSUS OF MANUFACTURING ESTABLISHMENTS

The annual Manufacturing Census is conducted as a component of the ABS's integrated economic statistics system. This system has been developed so that data from each industry sector conform to the same basic conceptual standards thereby allowing comparative analysis between and across different industry sectors. The results of this census are therefore comparable with economic data collections undertaken annually for the mining, electricity and gas industries and periodically for the wholesale trade, retail trade and construction industries.

Manufacturing, as specified in Division C of the Australian Standard Industrial Classification (ASIC), broadly relates to the physical or chemical transformation of materials or components into new products, whether the work is performed by power-driven machines or by hand.

The period covered by the annual Manufacturing Census is in general the twelve months ended 30 June. Where businesses find it impossible to supply information on this basis a substitute accounting period is used.

In accordance with the ASIC the basic census unit (referred to as the establishment) in respect of which statistics are collected in integrated economic censuses is in general a unit covering all the operations carried on under the ownership of one enterprise (business) at a single physical location. For Manufacturing Censuses, a manufacturing establishment is thus predominantly engaged in manufacturing activities, but the data collected for it covers (subject to the exception mentioned below) all activities at the location, namely:

- a the manufacturing activities primary to the industry class to which the establishment is classified;
- b any other manufacturing activities (ie production of commodities primary to another manufacturing industry class);
- c any selling and distribution activities connected with the commodities manufactured;
- d any non-manufacturing activities (eg merchandising of goods not manufactured by the establishment, extraction of raw materials for use by the establishment).

The exception relates to locations where the subsidiary activities exceed a specified value* which varies from year to year in terms of sales and transfers out of goods and services during the year; these locations are treated for statistical purposes as two or more establishments corresponding to the various kinds of activity carried on.

The establishment statistics also include data relating to separately located administrative offices and ancillary units (such as head offices, storage premises and manufacturers sales branches or sales offices) serving the establishment and forming part of the enterprise which owns and operates the establishment. It should be noted however that sales branches or offices which distribute to customers from stocks held by them are classified to the wholesale industry.

The full range of data is collected from all manufacturing establishments owned by multi-establishment enterprises and single establishment manufacturing enterprises with four or more persons employed. Employment and wages and salaries data only are collected from single establishment manufacturing enterprises with fewer than four persons employed. These small enterprises contribute only marginally to statistical aggregates other than number of establishments.

The data for all establishments (see series in data group 6) is shown by SLGA and LLGA. The data for all establishments (excluding single establishment enterprises with fewer than 4 persons employed (see series in data group 7)) is shown by Statistical Division.

The classification of census units to industry is based on the 1978 edition of the ASIC.

DESCRIPTION OF DATA ITEMS

ESTABLISHMENTS AT 30 JUNE

The number of establishments in operation at 30 June relates to manufacturing establishments as such and does not include the numbers of separately located administrative offices and ancillary units.

EMPLOYMENT

Working proprietors and employees on payroll, including those working at separately located administrative offices and ancillary units.

WAGES AND SALARIES

The wages and salaries of all employees of the establishment, including those working at separately located administrative offices and ancillary units. Drawings of working proprietors are excluded.

TURNOVER

Sales (exclusive of excise and sales tax) of goods whether produced by the establishment or not, plus transfers out of goods to other establishments of the same enterprise, plus bounties and subsidies on production, plus all other operating revenue from outside the enterprise (such as commission, repair and service revenue and, from 1978-79, rent, leasing and hiring revenue), plus capital work done for own use, or for rental or lease. Receipts from interest, royalties, dividends, and the sale of fixed tangible assets are excluded.

Transfers to and from other establishments of the enterprise are valued, for statistical purposes, at prices commensurate with the prices which would have been received or paid if the establishments concerned had been under separate ownership, ie at commercial selling price. A significant proportion of the commodities manufactured by some industries (eg the petroleum refining industry) is manufactured on commission for non-manufacturing enterprises from materials owned and supplied by those enterprises. As a consequence the turnover figures do not reflect the gross value of those commodities but only the commission earned relating thereto.

STOCKS - OPENING AND CLOSING

Stocks of materials, fuels, etc and finished goods and work-in-progress of the establishment whether located at the establishment or elsewhere.

PURCHASES, TRANSFERS IN AND SELECTED EXPENSES

Purchases of materials, fuels, power, containers, etc and goods for resale, plus transfers in of goods from other establishments of the enterprise, plus charges for commission and sub-contract work, repair and maintenance expenses, outward freight and cartage, motor vehicle running expenses and sales commission payments and, from 1978-79, rent, leasing and hiring expenses.

Transfers in and selected expenses are valued, for statistical purposes, at prices commensurate with the prices which would have been received or paid if the establishments concerned had been under separate ownership, ie at commercial selling price. A significant proportion of the commodities manufactured by some industries (eg the petroleum refining industry) is manufactured on commission for non-manufacturing enterprises from materials owned and supplied by those enterprises. As a consequence the value of materials used in producing those commodities is not reflected in the figures for purchases, transfers in and selected expenses.

VALUE ADDED

Turnover, plus increase (or less decrease) in the value of stocks, less purchases, transfers in and selected expenses.

While value added is the basic measure of an industry's contribution to total production it cannot be inferred that when wages and salaries are deducted from value added, the whole of the surplus is available for profit. There are many miscellaneous expenses (such as depreciation, workers' compensation insurance, other insurance, payroll tax, income tax, rates, advertising, interest on borrowed funds, bad debts, and other sundry charges) which are not taken into account in arriving at value added. Value added as calculated in the Manufacturing Census differs from the concept used in the National Accounts, where the concept of value added also excludes some administrative expenses and sundry charges, and the change in stocks component is measured by valuing the physical change in stocks at current prices.

FIXED CAPITAL EXPENDITURE

Outlay on new and second hand fixed tangible assets less disposals. Includes fixed capital expenditure on manufacturing establishments not yet in operation.

* Refer to Manufacturing Establishments: Details of Operations by Industry Class, Australia (82030) for individual census years for more information.

RETAIL TRADE

CENSUS OF RETAIL ESTABLISHMENTS

Retail trade data on AMIS were compiled from the 1979-80 Census of Retail and Selected Service Establishments. The statistics relate to all establishments classified to Australian Standard Industrial Classification subdivision 48 - Retail Trade except Bread and Milk Vendors.

Retail Trade, as specified in the Australian Standard Industrial Classification, generally includes the resale of new or used goods to final consumers for personal or household consumption. Also, to conform with the concepts and definitions used in the Australian National Accounts, the sale of certain commodity items are treated as wholesale rather than as retail sales. These commodity items are building materials; builders' hardware and supplies such as tools of trade, paint, etc.; commercial refrigerators; business machines; tractors, farm machinery and implements, earth moving equipment; and grain, feed, fertilisers and agricultural supplies. Consequently, where sales of these items constitute the predominant activity of an establishment, the establishment has been classified as a wholesale establishment and not included in the retail census. Where sales of these items are made by an establishment predominantly engaged in retail activities, then the sales of these commodities are shown in economic census tabulations as wholesale sales and are included in turnover figures. It should be noted that establishments mainly engaged in both baking and retailing cakes are treated as retailers, but establishments mainly engaged in both baking and retailing bread are treated as manufacturers and are included in the Manufacturing Census. In addition, the following industry classes - 4861 New Motor Vehicle Dealers, 4862 Used Motor Vehicle Dealers, 4866 Motor Cycle Dealers and 4867 Boat and Caravan Dealers - include all establishments predominantly engaged in either wholesaling or retailing new or used motor vehicles, motor cycles, boats, caravans, trailers etc., as appropriate. Sales of motor vehicles (other than sales to motor vehicle dealers) whether for industrial, commercial or private use were treated as retail sales in the census (despite the inclusion of some wholesale sales). Establishments whose predominant activity is wholesaling new tyres, tubes, batteries or new motor vehicle parts or accessories have been classified as wholesale establishments.

Because of difficulties in ensuring adequate coverage, some types of establishments were excluded from the census even though they would have been classified to industries covered by the census. These are door to door salesmen, independent van salesmen (of all kinds other than independent bread and milk vendors), and occasional stall holders. In addition, details were not collected from organisations operating vending machines on the premises of other businesses.

DESCRIPTION OF DATA ITEMS

Establishments at 30 June: The number of establishments in operation at 30 June relates to retail establishments as such and does not include the number of separately located administrative offices and ancillary units.

Employment at 30 June: Working proprietors and employees (including both full time and part time) on the payroll, including those working at separately located administrative offices and ancillary units. Unpaid helpers are excluded.

Wages and Salaries: The wages and salaries of all employees of the establishment, including those working at separately located administrative offices and ancillary units. Drawings of working proprietors are excluded.

Turnover: Sales of goods (retail and wholesale); all other operating revenue from outside the enterprise such as repair and service revenue; hiring of consumer goods, commissions; and rent, leasing and hiring revenue. Receipts from interest, royalties, dividends and the sale of fixed tangible assets are excluded.

Refer to Census of Retail Establishments and Selected Services Establishments: Details of Operations by Industry Class, Australia, 1979-80 (8622.0) for more information.

AGRICULTURAL ACTIVITY

AGRICULTURAL CENSUS

Most of the agricultural statistics published by the ABS and all of the agricultural statistics included in AMIS are derived from the annual Agricultural Census. The Census which is conducted throughout Australia at 31 March, collects data from establishments with agricultural activity.

In recent years, in order to minimise respondent burden and reduce processing costs, the ABS has been gradually excluding from the Census those establishments which make only a small contribution to overall agricultural production. Since 1976-77, establishments with agricultural activity have been included in the Agricultural Census if the operating enterprise had, or was expected to have an estimated value of agricultural operations of \$1,500 or more. In 1981-82 this figure was raised to \$2,500 in order to minimise the effects of inflation on the scope of the Agricultural Census.

(While these changes have resulted in some changes in the number of establishments appearing in publications the effect on the statistics of production of major commodities is small. Statistics of minor commodities normally associated with small scale operations may be affected to a greater extent).

The estimated value of operations is obtained for each establishment by applying unit values to crop and livestock information collected in the Agricultural Census. The unit values used are three year weighted average prices as these reduce the effects of short term price fluctuations.

AGRICULTURAL ESTABLISHMENTS

Economic units engaged in agricultural activity are delineated within a hierarchy of units - the enterprise group, enterprise and establishment. The establishment, which is the smallest economic unit in the system, covers all operations carried out by one enterprise at a single physical location. For the agricultural sector, a physical location has been interpreted to mean each individual agricultural holding. However, where two or more holdings in the one local government area (county in South Australia) are operated under one management, the holdings are combined to form one establishment.

The term 'agriculture' is used here in the broad sense to include the breeding, keeping or cultivation of all kinds of animal or vegetable life except forest trees and marine life. However, non-land-based agricultural activities such as beekeeping are not included in small area statistics (eg the local government area aggregates included in AMIS), although they are incorporated into State and national aggregates (published elsewhere by the ABS).

DESCRIPTION OF DATA ITEMS

All statistics of area refer to the year ended 31 March: livestock numbers are as at 31 March, and wool production is for the year ended 30 June.

NUMBER OF ESTABLISHMENTS

This is the total of establishments reporting agricultural activity during the year ended 31 March but excluding those beekeepers whose activities are non-land-based.

AREA OF ESTABLISHMENTS

Comprises areas of crops and sown pastures and grasses as well as land used for grazing, lying idle, fallow, etc. Some establishments would encompass waste land such as unvegetated ephemeral lakes and mangrove swamps as well as marginal or forested land not suitable for agriculture.

AREA OF SOWN PASTURES AND GRASSES

Comprises lucerne, clovers and grasses which are high yielding pasture plants introduced to replace native vegetation and to improve livestock carrying capacity. Excludes native pasture.

AREA OF WHEAT FOR GRAIN

Excludes area of wheat for hay, green feed or silage.

AREA OF BARLEY FOR GRAIN

Includes the two types of barley for grain, 2-row (over 90% of area sown) and 6-row. Excludes area of barley for hay, green feed or silage.

AREA OF OATS FOR GRAIN

Excludes area of oats for hay, green feed or silage.

AREA OF SUGAR CANE CUT FOR CRUSHING

Includes only those plantings cut for crushing to sugar. Excludes plants cut for propagation or those immature or stood over for harvesting in the following season.

AREA OF GRAIN SORGHUM

Excludes area of grain sorghum for green feed or silage.

AREA OF SUNFLOWERS

AREA OF POTATOES

Includes both early and late potato crops.

AREA OF TOMATOES**AREA OF ONIONS**

Includes both white and brown onions

AREA OF ORCHARD TREES (INCLUDING NUTS)

Comprises citrus, pome, stone and other fruit, and nut trees, both bearing and not yet bearing. Excludes plantation type fruit such as bananas, papaws, passionfruit, pineapples and berry fruit.

AREA OF GRAPEVINES

Includes bearing and non-bearing vines.

NUMBER OF BEEF CATTLE AND CALVES**NUMBER OF DAIRY CATTLE AND CALVES**

These include house cows and heifers kept primarily for farmers' own milk supply.

NUMBER OF SHEEP AND LAMBS**NUMBER OF PIGS****SHORN WOOL PRODUCTION**

This comprises all shorn and crutched wool (whether sold or unsold) from sheep belonging to the establishment wherever shorn. Excludes dead wool.

The 19 agricultural items which are included in AMIS are only a small selection of the range of agricultural data available from the ABS. For users who require a wider range of detailed agricultural data the ABS also provides, on magnetic tape and microfiche, an Agricultural Data Dissemination Service (ADDS). ADDS is produced annually and includes data for approximately 500 items for approximately 900 small areas (usually LGA's) throughout Australia. For further information on ADDS please contact the ADDS Contact Officer on (062) 525337.

TOURIST ACCOMMODATION

The scope of this survey may vary from time to time depending on the needs of the users and the ABS resources available. The types of establishments currently included in the survey are:

Tourist Accommodation Establishment: An establishment which predominantly provides accommodation of a short term nature (ie for periods of less than 2 months) to the general public.

LICENSED HOTEL (WITH FACILITIES)

A tourist accommodation establishment which is licensed to operate a public bar, provides bath or shower and toilet in most guest rooms, and has breakfast available for guests.

MOTEL (LICENSED OR UNLICENSED), PRIVATE HOTEL OR GUEST HOUSE (WITH FACILITIES)

A tourist accommodation establishment which provides bath or shower and toilet in most guest rooms, and has breakfast available for guests, but is not licensed to operate a public bar. This also includes motels that are licensed to serve liquor with meals.

CARAVAN PARK

A tourist accommodation establishment which provides powered sites for caravans and toilet, shower and laundry facilities for guests.

DESCRIPTION OF DATA ITEMS

Number of Establishments: The number of tourist accommodation establishments within the scope of the survey which operated during the survey period or closed temporarily because of seasonal reasons. Establishments comprising more than one type of accommodation activity (eg a motel with attached caravan park) are treated as two separate establishments. Included are those establishments which operated for any part of the quarter or which closed temporarily for the quarter because of seasonal reasons.

Capacity of Establishments: In the case of hotels and motels with facilities, capacity of establishment refers to the maximum number of rooms, units, suites, etc. available for accommodating paying guests during the survey period. In the case of caravan parks, capacity of establishment refers to the maximum number of on-site vans, other powered sites, unpowered sites and cabins, flats etc available for accommodating paying guests during the survey period.

Room Occupancy Rate: The proportion of guest rooms occupied in hotels and motels with facilities to the number of guest rooms available during the survey period, expressed as a percentage.

Site Occupancy Rate: The proportion of sites occupied in caravan parks to the total caravan park capacity available during the survey period expressed as a percentage.

FINANCE

As noted in the 1979-80 AMIS supplement, a collection of standardised local government finance statistics (SLGFS) was introduced in 1979-80.

Difficulties encountered with the processing of data for this first year led to some discrepancies in the published figures occurring between groups of items and sub-totals. Where this has occurred the component items are, in general, more reliable than the sub-totals. Work is continuing to correct any remaining discrepancies and revised figures will be issued at a later date.

All local authorities throughout Australia are required to compile statements of accounts for audit purposes. In all States except Victoria, the ABS uses copies of the accounts as a primary data source for local government finance statistics. These accounts are generally supplemented by questionnaires which request additional detail on each local authority's activities.

The source data is derived from a mixture of both cash and accruals accounting systems as used by the LGA's, and no attempt has been made to adjust the data to an accruals basis which would be conceptually correct for Australian National Accounts purposes.

For 1979-80 and 1980-81, estimates of local government finance statistics on the previous basis (AMIS finance statistics) have been derived, where possible, by aggregating appropriate SLGFS data. These estimates are included in the 'Finance - AMIS items' series. See page 2.22 of these notes.

REFERENCE PERIODS

Except for New South Wales and Victoria the reference period for the statements of accounts and questionnaires of all States and the Northern Territory relates to the year ended 30 June. The New South Wales data relate to the year ended 31 December, the reference period is 6 months earlier than those using the year ended 30 June reference period. The Victorian data relate to the year ended 30 September and the reference period is 3 months later than those using the year ended 30 June reference period.

DESCRIPTION OF DATA ITEMS**REVENUE****ORDINARY SERVICES - RECEIPTS**

This table provides an overall summary of an LGA's receipts (from revenue and loans) for ordinary services.

Rates (including penalties): The total of gross rates levied, government subsidies for pensioner rates, government subsidies for special cases (eg subsidies to encourage decentralisation of industry) and penalties charged on overdue rates less discounts for early payment, pensioner remissions and reductions, and other remissions (eg in cases of special hardship or as encouragement for decentralisation of industry).

Garbage charges: Includes only those charges relating to the collection and disposal of domestic or household garbage. As some councils finance garbage services from the general rate, this item should be examined in conjunction with Rates levied.

Other fees, licences and fines: Includes building fees, parking fines, dog registration, other fees licenses and fines and other charges.

Reimbursements received for Roads: Includes reimbursements paid by a state road authority for work performed by a council on those roads which are the responsibility of the state road authority.

Government grants: Includes general purpose Government grants as tax revenue sharing grants, local government assistance grants and other untied grants. Also includes special purpose government grants (including unemployment relief grants) for the purchase or construction of new or existing fixed assets and for assistance with the operating expenses or running costs of services including repairs and maintenance of plant and equipment and the purchase of consumable items.

Other revenue: Includes all other revenue other than loan receipts (eg trading receipts, land sales, interest received, etc.).

Total loan receipts: Includes loans from Commonwealth and State governments and loans from other lenders.

ORDINARY SERVICES - OUTLAY - PURPOSE**PURPOSE CLASSIFICATION**

General Public Services: Includes only those expenses relating to council members, executive staff and general office (including council chamber expenses), ie 'head office' type expenses only.

Public Order and Safety: Includes fire protection costs, animal control, and other public order and safety costs (eg lifesaving, beach patrols, and contributions to State emergency services).

Education: Includes kindergartens and other centres having qualified teachers and which are primarily educational institutions. Also included are the operation of school bus services, student hostels the provision of scholarships etc.

Health: Includes services for infants and mothers such as baby health centres and the provision of mothercraft nursing services; preventative services such as health administration, immunisation and X-ray programs, school dental and health schemes and the eradication of noxious insects and vermin; and other health services such as ambulance services, hospitals and home nursing.

Welfare: Includes services for families and children such as creches, child minding centres and other play centres and services such as emergency home help; services for the aged and disabled such as senior citizens centres, meals-on-wheels; and other welfare services such as women's refuge (crisis) centres, drop-in centres for the unemployed or youth, services to migrants, and social workers salaries.

Housing: Relates to the provision of housing for rental or use by employees and houses for sale to the public. Includes housing for aged persons and aborigines.

Community Amenities: Includes household garbage services, operation of rubbish tips, trade waste disposal, cleaning of streets, gutters etc, anti litter enforcement, sewerage, urban stormwater drainage, flood mitigation works, beach restoration, removal of dead animals, disposal of derelict or abandoned vehicles, street lighting, town planning, land clearing, pedestrian malls or plazas, women's rest centres, drinking fountains etc.

Recreation and culture: Includes public halls, civic centres, swimming pools and beaches, other indoor and outdoor sporting and recreation facilities, libraries, the operation and support of the performing arts, art galleries and orchestras, the preservation of the national estate, and the presentation of festivals.

Transport: Includes construction and maintenance of roads and bridges, road plant purchases, parking, aerodromes and other transport facilities such as wharves, jetties, docking slips etc.

Other: Includes rural services, tourism and area promotion, building control, saleyards and markets, other economic services (eg quarries, plant nurseries), natural disaster relief, and engineering and employment overheads together with plant purchases that cannot be classified elsewhere.

FINANCE - TRADING ACTIVITIES

This table shows the involvement of local authorities in trading activities (gas, electricity, water supply, sewerage, abattoirs and other).

INTEREST (ALL PURPOSES)

Interest Paid: To Commonwealth and State government public subscription loans, financial institutions, bank overdraft etc.

Interest Received: From Commonwealth government stocks and bonds, securities from state and local government authorities, banks, other (including the short term money market).

FINANCE - AMIS ITEMS

In order to provide time series of local authority finance data AMIS items have been included from 1967-68 to 1980-81. Items for 1979-80 and 1980-81 have been estimated by aggregating, where possible, appropriate SLGFS data. The comparability of some data items between 1979-80 and earlier years have been affected by changes in classifications, definitions and accounting methods associated with the introduction of standardised statistics. For reasons explained on page 2.18, care should be exercised when using the 1979-80 AMIS finance items.

Estimates of AMIS finance items will not be produced for 1981-82 and subsequent years.

For further details of the SLGFS data included in AMIS see page 2.20 of these notes.

The descriptions of items which follow are the same as contained in the AMIS manual Third Edition December 1980.

DESCRIPTION OF DATA ITEMSREVENUE - ORDINARY SERVICES

The broad grouping used for ordinary services revenue items is as follows:

Taxation (rates and penalties, licences, fees and fines);

Charges (for council properties and services);

Reimbursements, contributions and government grants; and

Other revenue.

Government grants, street construction contributions, developers' contributions and reimbursements for work done by councils are included unless they are credited to separate loan funds in which case they are included in the item "Loan Fund Receipts - Ordinary Services" (as is the case for certain government grants in Victoria, Queensland and Tasmania). Figures for all government grants are derived by aggregation of items under Ordinary Services Revenue, Loan Fund Receipts, Water Supply, Sewerage, Electricity and Gas.

Rates and Penalties: Rates in all States are based on rateable property values, the basis varying between States and even within some States. Rates are compulsory levies designed primarily to raise general revenue (as distinct from fees for regulatory services) which do not entitle the payer to any direct appreciable, tangible benefit. This item includes general and other special or local rates (excluding water and sewerage rates) levied or declared or, where the cash accounting system operates, collected. However, rates collected are shown for the City of Brisbane. The item also includes extra charges (penalties) for overdue rates, gratuitous payments in lieu of rates by government instrumentalities whose properties are exempt from rating, and (since 1974-75 in all States) government subsidies for remission of pensioner rates.

In some areas special rates or provision in the general rate for garbage removal takes the place of specific user charges.

Victoria - Prior to 1979-80 some garbage charges were included under this item. Those charges appear under 'Revenue Charges for Sanitary and Garbage' for 1979-80 and 1980-81.

Licences, Fees and Fines: This item covers a wide range of licences and fees usually associated with the granting of a permit or privilege and not primarily designed to raise revenue. They are imposed under the Local Government Acts and other State Acts, and include building regulation fees, dog registration fees and fines and court costs where collected by local authorities. However, some designated fees are included under "Charges for Services" (eg subdivision and parking fees). In Western Australia comparison of this item before and after 1969-70 is significantly affected by the transfer to the State Government of the bulk of revenue collected by local authorities for motor vehicle licences and certain associated fees (effective from 1 July 1969). The revenue brought to account by all local authorities in the State from motor vehicle licences and fees was \$4,602,000 in 1967-68, \$5,038,000 in 1968-69 and \$930,000 in 1969-70.

Charges for Sanitary and Garbage Services: This item consists of charges (as distinct from rates levied - see comments on item "Rates and Penalties") imposed for sanitary and garbage services.

See notes for Other Revenue.

Charges - Parks, Recreation Grounds: This item comprises admission charges to the public and rentals paid by outside bodies in respect of public baths, golf links, zoos, recreation grounds, etc.

Charges - Halls, etc: This item covers admission charges and rents for public halls (including municipal offices except in Queensland), shops, theatres, civic centres, etc.

See notes for Other Revenue.

Charges - Other Council Properties: This item covers earnings (admission charges, rents, etc) of council properties not included under the three preceding headings, especially public markets, libraries, museums and art galleries, aerodromes, cemeteries, caravan parks, etc.

In Queensland this includes net rents from council properties. Proceeds from the sale of surplus materials and from quarry products, etc, are also included under this item. In New South Wales, Victoria and Queensland this heading includes income from hire of council plant (net of operating expenses) which, in South Australia and Tasmania is offset against roads expenditure, and in Western Australia against other revenue expenditure.

From 1979-80 this item was discontinued and data included in Revenue: Charges for Other Services.

Charges for Other Services: The main components included are car parking charges, kerbside parking fees, subdivision fees and, in Victoria and Western Australia, town planning fees. In NSW and Queensland the latter component is included under "Licences, Fees and Fines". Some States also include other charges (NSW - immunisation, baby health centres, cemeteries, conveniences, women's rest centres, national fitness play centres, and aerodromes etc; Victoria - infant welfare, home help and elderly citizens, supervision of private streets, etc; Queensland - immunisation and inspection charges; South Australia - sewerage and effluent drainage fees, fire protection, health, weights and measures, tourism, vermin control, weed control, cemeteries, burial fees, public conveniences, impounding charges, etc; Tasmania - private streets (frontagers' repayments).

See notes for Charges - Other Council Properties and Other Revenue.

Reimbursements for Work Done: This item represents, in the main, receipts (described as grants, reimbursements, or refunds in the different States) from State road authorities and other authorities for construction and/or maintenance work done by councils on their behalf. In Victoria receipts from the Country Roads Board for "unclassified" roads are included under "Government Grants - Roads".

Western Australia - this item included only government construction and maintenance prior to 1980. Subsequent years include private construction and maintenance and other reimbursements for work done by the local government authority or council.

See notes under Street Construction Contributions.

Street Construction Contributions: This item comprises contributions toward the costs of constructing roads, footpaths, kerbing and guttering, etc associated with -

- . private subdivision (to the extent that councils are paid for work done on behalf of developers); and
- . council works for which property owners are liable to meet the cost in part or in full.

It excludes reimbursements for work done (shown under another heading) except in New South Wales where reimbursements of costs for reinstating roads and footpaths opened under permits to lay on telephones, water, gas, etc and reimbursements of costs of non-road private works are included.

Victoria - Repayments of the principal for private streets and footpaths, kerbs and channels, were included under this item prior to 1979-80 but now appear under Reimbursements for work done.

Tasmania - due to the introduction of the SLGFS service there is data for this item from 1980.

Government Grants - Roads: This item comprises grants received specifically for roads (including repair of flood damage, except in Queensland) where these are credited to revenue funds of councils; in Queensland and Tasmania some grants for roads are also credited to loan funds. The major component is grants made from joint Commonwealth-State road moneys or, in New South Wales and Queensland, Commonwealth road grants distributed by the State road authorities (but in New South Wales before February 1975 they were distributed by the Department of Public Works).

Reimbursement to councils for work done on behalf of the State road authorities, etc are excluded, being shown under "Reimbursement for Work Done".

This item includes data that prior to 1980 was classified to Loan Fund Receipts - Government Grants - Roads.

Government Grants - Other: Figures consist of all other specific purpose grants for ordinary services and general purpose grants which are credited to council revenue funds. Some government grants (subsidies) are credited to loan funds in Victoria, Queensland and Tasmania. Grants for water supply, sewerage, and electricity and gas which are not part of the scope of ordinary services are shown elsewhere on the data file.

This item includes data that prior to 1980 was classified to Loan Fund Receipts - Government Grants - Other.

Amounts under this heading include Commonwealth Grants Commission grants (from 1974-75), State general purpose grants, unemployment grants, drought relief grants and flood relief (other than those under "Government Grants - Roads". Recoups by State Governments to councils for remission of rates owing by pensioners are included under "Rates and Penalties" from 1974-75, where previously in some States they were included in this item.

Other Revenue: This item covers all general revenue not classified to preceding headings, eg interest receipts. Additional items are also included in some States (NSW - proceeds from sale of assets, instalments received on debts owing to councils etc; Victoria - sale of assets, transfers from business undertakings etc; South Australia - aerodromes, revenue from the installation of septic tanks, street lighting etc).

Victoria - Prior to 1979-80 some data that should have been classified to this item were included under other revenue items. For instance, reimbursements and/or contributions and donations for Halls etc. may have been included under Revenue: Charges for Halls etc. rather than Other Revenue.

Queensland - Since 1979-80 Data for plant hire, quarry sales and sale of properties data is included in this item rather than charges for other services.

Western Australia - Since 1979-80 this item does not include other reimbursements for work done by the Local Government Authority. It now includes the revenue from sale of road plant, sale of land and sale of other assets.

Total Revenue Ordinary Services: This item represents the sum of the preceding ordinary revenue services headings and has been derived for each State as follows:

New South Wales - Item represents sum of the following for the general fund and special and local funds providing similar services (interfund transfers have been offset):

Total Income (Revenue account);

Book value of assets sold (net of loss on sales);

Time payment debts to councils repaid in year.

Victoria - Item represents sum of the receipts of General Account, Private Streets Account, Separate Rates Account and Country Roads Board Account, adjusted to exclude inter-fund transfers.

Queensland - Item represents total receipts of all funds other than water, sewerage, electricity and transport funds, adjusted for certain expenditure items netted against receipts (eg refunds, trust money and investment movements). Inter and intra-fund transfers are excluded.

South Australia - Item represents total income of General Fund plus government grants allocated for road works and interest and other receipts of reserve funds. (Inter-fund transfers have been offset.)

Western Australia - Total receipts of all funds other than trust, electricity and loan funds.

Tasmania - Total receipts of all funds other than water, sewerage, abattoir and loan funds. (Inter-fund transfers have been offset.)

REVENUE EXPENDITURE - ORDINARY SERVICES

Figures shown for these items represent all ordinary services expenditure (both current and capital) financed from revenue funds. In Victoria, Queensland and Tasmania they exclude expenditure financed from government grants, etc, credited to loan funds (See - Loan Fund Receipts and Expenditure: Ordinary Services). In Western Australia the classification of some expenditure items since 1973-74 is not strictly comparable with that for previous years (halls, other property, etc.).

General Administration Expenditure: This item relates to the source document entry so described and covers expenses for general office, building control (except in Victoria and South Australia), valuations, elections and council allowances. The figures also include expenses such as payroll tax, superannuation, long service leave, etc., where these amounts are not allocated to functions (roads, water supply, etc.).

In Western Australia from 1969-70 this item was significantly reduced after introduction of a new procedure for allocating a proportion of administration expenditure to road construction.

Interest Paid: Interest paid relates to loans, government advances and bank overdrafts, excluding amounts accounted for in trading funds. In Queensland prior to 1970-71 figures include interest on sewerage debt.

Redemption: Redemption relates to the principal of loans and government advances repaid and contributions to sinking funds paid from revenue, but excludes amounts applicable to trading funds. In Queensland prior to 1970-71 figures include redemption of sewerage debt.

Public Works and Services - Roads, Streets, etc.: Subject to the qualifications referred to below for particular States, expenditure on roads and streets covers construction (including land purchases debited to road accounts) and maintenance expenditure from revenue fund on:

1. Roads and streets (including traffic control and road signs), bridges, footpaths, kerbing and guttering, tree planting, grass plots, etc. It also includes contributions to State road authorities to meet the local government share of the cost of proclaimed roads (including to 31st December 1971 the "Section 11" contributions by councils in the NSW County of Cumberland which were based on rateable property values);

2. Drains, sewers and stormwater channels (in Queensland and Tasmania restricted to drainage associated with road works);

3. Vehicular ferry operations (except in Queensland);

4. Supervision, and indirect expenses (engineers' salaries and engineers' office expenses, plus a varying proportion of general administration expenses where these are charged to public works and services - eg in Western Australia). However, in Victoria some councils charge these expenses instead to general administration.

Expenditure on roads and streets, etc., comprises direct costs (whether recoverable or not) wages, stores and materials. The operating costs of plant and machinery are charged to roads in all States and are therefore included. However, any surplus or deficit of plant hire income over plant expenses is not treated consistently between the States.

New South Wales. Figures shown include expenditure under Sections 499 and 500 of the Local Government Act (recoverable expenditure on roads and other works). Expenditure on street and gutter cleansing is also included for all councils, other than the City of Sydney - in most other States and the City of Sydney this component is included in "Public Works and Services - Sanitary and Garbage". Plant hire deficits are included in this item and surpluses in "Charges - Other Council Properties".

Victoria. Figures shown include expenditure from the Private Street and Country Roads Board Accounts operated by each local authority, adjusted to exclude loan expenditure, if any, which is included elsewhere. The recoupment of roads expenditure by the Country Roads Board is also included in ordinary services revenue. This procedure has been followed to achieve comparability of treatment with other States. Plant hire surpluses are included in "Charges - Other Council Properties" and deficits as "Expenditure - Other Properties".

Queensland. Plant hire surpluses are treated as "Charges - Other Properties" and deficits as "Expenditure - Other Properties".

South Australia. The surplus or deficit of plant hire over plant expenses is treated as roads expenditure.

Western Australia. From 1969-70 this item was significantly affected following introduction of a new procedure for allocating a larger proportion of administration expenses to road construction. Figures shown include expenditure on street cleaning until 1971-72. The surplus or deficit of plant hire over plant expenses is treated as "Other Revenue Expenditure".

Tasmania. Actual expenditure on purchase of road plant is included in lieu of depreciation of this asset as is the case in other States. The surplus or deficit of plant hire income over plant expenses is included in this item.

Public Works and Services - Health and Welfare Administration: In Queensland, South Australia and Western Australia figures for this item are restricted to "health" (general health services, baby health centres, etc.) as "welfare" expenditure is not identified in the source documents. In South Australia figures include contributions under the State Hospitals Act. For the other three States "welfare" as described in the source documents, refers to pre-school centres, elderly citizens centres, housekeeper services, home help, etc.

South Australia - Prior to 1980 compulsory contributions to recognised hospitals were included in Revenue Expenditure: Public Works and Services - Health and Welfare, but are now included in Revenue Expenditure: Grants, Subsidies and Levies NEI.

Public Works and Services - Sanitary and Garbage: This item includes expenditure on street cleansing except for councils in New South Wales other than the City of Sydney and Western Australia (until 1971-72), where the item is taken into road maintenance expenditure.

South Australia - As the accounting instructions are more definite than prior to 1980, data have been included under Revenue Expenditure: Public Works and Services - Sanitary and Garbage Services that in earlier releases would have been included under other headings. For example, garbage collections in reserves were sometimes allocated to Council Properties - Parks and Recreation Grounds in earlier years, rather than to Public Works and Services - Sanitary and Garbage Services.

Western Australia - Expenditure on sewerage is now included in Revenue Expenditure: Public Works and Services - Sanitary and Garbage Services rather than Revenue Expenditure: Other.

Public Works and Services - Street Lighting: Includes cost of electricity consumed and all other expenditure associated with the provision of street lighting. In Queensland and Victoria (the City of Melbourne) some local authorities conducting electricity undertakings charge the cost of street lighting direct to their electricity funds.

Grants, Subsidies and Levies, n.e.i.: Comprises -

1. voluntary payments to hospitals, ambulances, charities, bands and other organisations; and
2. compulsory levies not elsewhere included (eg contributions to fire brigades).

Compulsory contributions to planning authorities (eg State Planning Authority of NSW and Tasmanian Master Planning Authorities) are included under "town planning" expenditure.

South Australia - See notes for Public Works and Services - Health and Welfare.

Prior to 1980 contributions to the Fire Brigades Board were included in Revenue Expenditure: Other, but are now included in this item.

Council Properties - Libraries: Covers purchase of books, etc as well as maintenance and running costs. In Victoria and Tasmania figures include expenditure on museums and art galleries.

Council Properties - Parks, Gardens, Recreation Grounds, etc.: Includes public baths, golf links, zoos, national fitness facilities, etc.

Council Properties - Halls etc.: Covers public halls (including municipal offices except in Queensland), shops, theatres, civic centres, etc. In New South Wales expenditure on this item is included under "Other Council Properties" as it is not available separately.

Council Properties - Other Council Properties: Relates to current and capital expenditure from revenue on council properties, not elsewhere included - eg purchase of public works plant (except in Tasmania where it is included under "Roads" expenditure). Negative figures in New South Wales are the result of the compiling method whereby an offset is made against this item equivalent to depreciation on public works plant.

In Victoria and Queensland any deficit in the plant hire account is included under this heading, but in New South Wales, South Australia and Tasmania the deficit is included under roads expenditure - see also comments under "Charges - Other Council Properties".

Other expenditures included under this heading are -

- caravan parks
- aerodromes (except in NSW and Queensland)
- cemeteries (except in South Australia)
- parking (in Queensland and Tasmania)
- municipal offices (in Queensland)
- museums, art galleries (all States except Victoria and Tasmania)
- halls, etc. (in New South Wales)
- quarries (except where treated as separate trading activities).

This item has been discontinued since 1980 and the data is included under Other Revenue Expenditure.

Town Planning Expenditure: Consists mainly of contributions to State authorities (viz State Planning Authority of NSW and Master Planning Authorities in Tasmania); other expenditure relates to town planners' fees/salaries and expenses, and in Queensland assets purchased with revenue fund moneys for this function (eg land for re-zoning).

Other Revenue Expenditure: Relates to all ordinary services revenue expenditure not included under the above headings. There are minor inconsistencies of treatment for a few items as between this heading and "Other Council Properties" - eg expenditure on parking facilities, aerodromes and cemeteries is included under other council properties in Queensland but under other expenditure elsewhere.

The most prevalent items included under this heading are -

- flood mitigation works and relief (in NSW)
- cost of private recoverable works other than roads (except in NSW)
- cattle straying and commons
- noxious animals and weeds destruction
- fire prevention (other than compulsory levies)
- parking facilities (except in Queensland and Tasmania)
- tourism, public conveniences, civil defence
- aerodromes (in NSW and Queensland)
- building and scaffolding, weights and measures, dog registration expenses (in Victoria and South Australia)
- cemeteries, septic tank installations, water services, senior citizens facilities and services, public functions, impounding of animals (in South Australia)
- under or over-absorption of plant operation expenses (in Western Australia).

South Australia - See note under Public Works and Services - Health and Welfare.

Western Australia - See note under Public Works and Services - Sanitary and Garbage Services.

See also note under Council Properties - Other Council Properties.

Total Revenue Expenditure - Ordinary Services: This item represents the sum of the preceding expenditure headings and has been derived for each State as follows -

New South Wales - Item represents the sum of the following for the general fund and special and local funds providing similar services-

- Total Expenditure charged to Revenue I Account, less loss on sale of assets
- Capital Expenditure (Revenue II Account)
- Debt Redemption (Revenue II Account)
- Time Payment Debts to Council Incurred (Revenue II Account)
Less
- Loan Expenditure and Time Payment Debts incurred by Council
(Inter-fund transfers are offset).

Victoria - Item represents the sum of total "gross" expenditure of General Account, Private Streets Account, Separate Rates Account, Country Roads Board Account, adjusted to exclude inter-fund transfers and loan expenditure in the case of Private Street and Separate Rates Accounts. Expenditure of the Country Roads Board Accounts is adjusted by the receipt item "Council's proportion of work on unclassified roads" which is already in General Account or Loan Account expenditure.

Queensland - Item represents total disbursements of all funds other than water, sewerage, electricity and transport funds, adjusted to exclude certain disbursements which are netted against receipts, eg refunds, trust moneys, and investment movements.

South Australia - Item represents total expenditure of general fund plus expenditure from reserve funds and from government grants for roadworks funds. (Interfund transfers have been offset).

Western Australia - Total payments of all funds other than trust, electricity and loan funds.

Tasmania - Total payments of all funds other than water, sewerage, abattoir, loan funds. (Inter-fund transfers have been offset).

LOAN FUND RECEIPTS AND EXPENDITURE - ORDINARY SERVICES

Loan Fund Receipts - Ordinary Services: Figures shown for government grants are amounts credited to councils' loan accounts - a procedure followed in Victoria, Queensland and Tasmania. Prior to 1970-71 the figures for Queensland (which also include sewerage grants) are combined with other loan fund receipts and separate details are not available.

Other loan fund receipts comprise loan raisings for ordinary services (including sewerage loans in Queensland prior to 1970-71). In Victoria small amounts for miscellaneous receipts (transfers from general accounts etc.) are also included. In NSW loan raisings are deduced from the increase in debt during the year.

See note under Revenue (Ordinary Services) Government Grants, Roads and Other.

Loan Fund Expenditure - Ordinary Services: Figures for Victoria, Queensland and Tasmania include expenditure financed from government grants, etc., credited to loan funds (see "loan fund receipts"). Expenditure on sewerage works in Queensland are excluded in the years prior to 1970-71 (as in other years) because they are shown elsewhere. Queensland figures for drainage and parks, etc (prior to 1973-74) and halls, etc. (in all years) are included under Other Loan Fund Expenditure headings as they are not available separately.

Drainage. The only States for which figures are available are Queensland (since 1973-74), South Australia and Tasmania. In all other States drainage is included under "roads, streets, etc". Figures relate to all drainage works not directly associated with road works, including flood mitigation projects in Queensland and sewerage and effluent drains in South Australia.

Parks, gardens, etc. Queensland figures since 1973-74 include civic centres and public halls.

Council Properties - Halls etc. Queensland figures were not identifiable prior to 1979-80.

Council Properties - NEI. From 1979-80 this item has been discontinued and is now included in Loan Fund Expenditure: Other.

Other. See note under Council Properties NEI.

WATER SUPPLY

Water supply is the responsibility of municipal authorities in New South Wales (other than areas supplied by the Sydney Metropolitan Water Board, Hunter District Board, Broken Hill Board and Cobar Water Board), Queensland and Tasmania. Only a few municipal authorities in Victoria operate water supply schemes which are mainly the responsibility of either the Melbourne and Metropolitan Board of Works (in the Melbourne area) or local waterworks trusts. In South Australia and Western Australia these schemes are operated only by the respective State governments, with some very minor exceptions.

Revenue (Current Income): Represents total revenue (mainly rates based on property value and/or other charges based on consumption) brought to account for water supply funds. It includes government grants brought to account in revenue funds except in New South Wales where government grants brought to account in the revenue funds are excluded because they are predominantly for capital purposes. In New South Wales capital contributions by the public are excluded.

Working Expenses: Amounts shown exclude interest paid, debt redemption and depreciation.

Interest Paid: Includes interest on bank overdrafts.

Expenditure on Fixed Capital Assets: Relates to expenditure during year on fixed assets, new and existing, financed mainly from loan funds but also includes expenditure from government subsidies and revenue surpluses. In New South Wales figures include contributions by councils to the Sydney Metropolitan Water Board towards the cost of new works in some outlying areas of the Board.

New Loan Raisings: Figures represent new loan raisings (including government advances) during the year excluding renewal and conversion loans. In New South Wales the figures are deduced from the increase in loans and government advances outstanding during the year (outstanding loans and advances at end of year plus principal repayments from revenue and sinking funds less outstandings at beginning of year).

Government Grants: Relates to grants for current and capital purposes for water supply whether credited to revenue or loan funds. In Tasmania grants by the Metropolitan Water Board (to councils in the Hobart area) for meeting debt charges and working expenses are excluded because they are offset against expenditure, but grants for capital purposes are included.

Debt Charges: Comprise interest on loans, government advances and bank overdrafts, plus debt redemption (other than from sinking funds), including contributions to sinking funds.

SEWERAGE

Sewerage is provided by municipal authorities in New South Wales (other than areas served by the Sydney Metropolitan Water Board, Hunter District Water Board, and the Broken Hill Water Board), Queensland and Tasmania. In the other three States sewerage is provided by either the State Government, as in South Australia and Western Australia, or separate authorities, viz the Melbourne and Metropolitan Board of Works and local sewerage authorities.

Revenue (Current Income): Represents total revenue (mainly rates and charges for sewerage) brought to account for sewerage funds. It includes government grants brought to account in revenue funds, except in New South Wales where government grants brought to account in the revenue funds are excluded because they are predominantly for capital purposes. In New South Wales capital contributions by the public are excluded.

Working Expenses: Amounts shown exclude interest paid, debt redemption and depreciation.

Interest Paid: Includes interest on bank overdrafts. In Queensland amounts are included under "Revenue Expenditure - Ordinary Services, Interest Paid" prior to 1970-71.

Expenditure on Fixed Capital Assets: Relates to expenditure during the year on new and existing fixed assets financed mainly from loan funds but also includes expenditure from government subsidies and revenue surpluses. In New South Wales figures include contributions by councils to the Sydney Metropolitan Water Board towards the cost of new works in some outlying areas of the Board.

New Loan Raisings: Figures represent new loan raisings, including government advances, during the year excluding renewal and conversion loans. In New South Wales the figures are deduced from the increase in loans and government advances outstanding during the year (outstandings at end of year plus principal repayments from revenue and sinking funds less outstandings at beginning of year). In Queensland amounts are included under "Loan Fund Receipts - Ordinary Services, Loan Fund Receipts" prior to 1970-71.

Government Grants: Relates to grants for current and capital purposes for sewerage whether credited to revenue or loan funds. In Queensland prior to 1970-71 these grants were included under ordinary services.

Debt Charges: Comprise interest on loans, government advances and bank overdrafts, plus debt redemption (other than from sinking funds), including contributions to sinking funds. In Queensland amounts are included under "Revenue Expenditure - Ordinary Services" prior to 1970-71.

ELECTRICITY AND GAS

Electricity funds are operated by some municipal authorities in all States except Tasmania but the numbers are small because electricity generation and distribution is predominantly the responsibility of State-wide or regional authorities, eg county councils in New South Wales. New South Wales is the only State in which municipal authorities conduct gas undertakings but the numbers involved are very small.

Revenue (Current) Income: Represents total revenue (mainly sales) brought to account. Government grants credited to revenue funds are also included in all States except New South Wales. Capital contributions by the public are excluded in NSW.

South Australia - this item now includes current government grants.

Government Grants: Comprise amounts credited to revenue accounts and in Queensland to loan accounts.

Current Expenditure: Is a combination of working expenses, depreciation (except in Queensland) and interest charges but excludes debt redemption. Interest charges are also reported under "Debt Charges".

Expenditure on Fixed Capital Assets: Relates to expenditure during the year on new and existing fixed assets financed from loans, government subsidies and revenue surpluses.

Debt Charges: Comprise interest paid on loans, government advances and bank overdrafts, plus debt redemption (other than from sinking funds), including contributions to sinking funds.

INDEBTEDNESS (ALL FUNDS)

The three groupings used are as follows-

- Outstanding at end of year
- New raisings during year
- Redemption during year.

Figures in the AMIS file relate to ordinary services funds and all trading funds including those not represented in the file (eg abattoir funds in New South Wales and transport funds in Queensland).

Debt Outstanding - Loans: Figures represent gross loans outstanding for councils in all States except New South Wales where accumulated sinking fund balances are offset. In Western Australia government advances, if any, are also included as they are not available separately.

Debt Outstanding - Government Advances: Figures represent amounts owing on Commonwealth and State government advances for all funds at the end of year. No amounts are shown for Western Australia because government advances, which are understood to be very small, are included under loans.

In Tasmania from 1971-72 loans from the Housing Department and semi-government bodies, previously classified as loans, are classified as government advances. However this break in comparability is not reflected in AMIS until 1972-73 (1971-72 data were inserted on the former basis).

Debt Outstanding - Total: Represents for all funds the sum of the two preceding headings.

New Money Raisings - Loans: Figures represent new loan raisings for all funds (excluding renewal and conversion loans) during the year. They include government advances, if any, in Western Australia. In New South Wales they are deduced from the increase in loans outstanding during the year (outstandings at end of year plus repayments during year from revenue and sinking funds less outstandings at beginning of year).

New Money Loan Raisings - Government Advances: Figures shown represent for all funds new government advances received during year.

No amounts are shown for Western Australia because government advances, if any, are included under loans. In New South Wales figures are deduced from the increase in government advances during the year (outstandings at end of year plus repayments during year less outstandings at beginning of year).

New Money Loan Raisings - Total: Figures represent for all funds the sum of the two preceding headings.

Redemptions, Repayments, etc.: Figures represent for all funds principal repayments (other than from sinking funds) of loans and government advances. Except for Queensland (other than Brisbane City Council) and for Western Australia, they exclude contributions to sinking funds which are shown separately under the next heading.

Sinking Fund Contributions: Figures shown represent contributions from all funds (including interest earnings except in Tasmania) to sinking funds for loan redemption. Data are not available for this item in Queensland (other than Brisbane City Council) for the years prior to 1971-72 or in Western Australia but the amounts involved (which are relatively small) are included under Redemption, Repayments, etc. for both States.

MISCELLANEOUS

DESCRIPTION OF DATA ITEMS

ROADS (KILOMETRES)

These statistics relate to roads which are open to the public and which are located within the area of each local authority whether they are the responsibility of the authority or not. Where a road forms the boundary between two local government areas half its length is accounted for by each area.

Sealed Roads: Those with bitumen, asphalt or concrete surfaces.

Formed and Surfaced Roads: Those with pavements constructed of gravel, rubble, limestone and by the use of soil stabilisation processes.

Formed Only Roads: Those without constructed pavement but which are formed by grader so that drainage of stormwater can occur.

Unformed Roads: Roads and tracks not elsewhere included above and which are customarily used by the public.

POPULATION ESTIMATES

The total population as estimated by ABS at 30 June for each local government area.

BUILDING

Building statistics relate to construction of new buildings and alterations and additions to existing buildings. Construction activity not defined as building (eg construction of roads, bridges, railways, earthworks etc.) is excluded.

Building statistics shown have two main components:

(a) building approvals, based on permits issued by local government authorities and on contracts let and day labour approved by Commonwealth and State authorities. Major building activity which takes place in areas not subject to the normal administrative approval processes (eg building on remote mine sites) is also included.

(b) building activity, based on a quarterly survey of builders and owner-builders collecting information about building work done on approved building jobs. The survey consists of two elements:

(i) a sample survey of private sector jobs involving new house construction or alterations and additions valued at \$10,000 or more to houses;

(ii) a complete enumeration of building jobs involving construction of new dwellings other than private sector houses, construction of new "other buildings" with an approval value of \$10,000 or more to buildings other than private sector houses.

DEFINITIONS

A "building" is defined as a rigid, fixed and permanent structure which has a roof. Its intended purpose is primarily to house people, plant, machinery, vehicles, goods or livestock. An integral feature of a building's design, to satisfy its intended use, is the provision for regular access by persons.

A "dwelling unit" is defined as a self-contained suite of rooms, including cooking and bathing facilities and intended for long term residential use. Units (whether self-contained or not) within buildings offering institutional care, such as hospitals, or temporary accommodation such as motels, hostels and holiday apartments, are not defined as dwelling units. The value of units of this type is included in the appropriate category of "other building".

A "dwelling" is defined as a building predominantly consisting of one or more dwelling units. Dwellings can be either "houses" or "other dwellings" as follows:

(a) A "house" is defined as a detached building predominantly used for long term residential purposes and consisting of only one dwelling unit. Thus, detached "granny flats" and detached dwelling units (such as caretakers' residences) associated with "other buildings" are defined as houses for the purpose of these statistics.

(b) An "other dwelling" is defined as a building which is predominantly used for long term residential purposes and which contains (or has attached to it) more than one dwelling unit (eg includes townhouses, duplexes, apartment buildings etc).

COMPLETED - A building is defined as completed when building activity has progressed to the stage where the building can fulfil its intended function. In practice, the ABS regards buildings as completed when notified as such by respondents to the survey.

UNDER CONSTRUCTION - A building is regarded as being under construction at the end of a period if it has been commenced but has not been completed, and work on it has not been abandoned.

COMMENCED - A building is defined as commenced when the first physical building activity has been performed on site in the form of materials fixed in place and/or labour expended (this includes site preparation but excludes delivery of building materials, the drawing of plans and specifications and the construction of non-building infrastructures, such as roads).

For practical purposes, a building is regarded by the ABS as having commenced in a particular quarter when the value of work done on the job to the end of the quarter, reported on the Building Activity Survey form, is equal to or greater than the following threshold values:

(a) for houses (including alterations and additions to houses), \$2,000;

(b) for other dwelling and other building jobs (including alterations and additions to other dwellings and other buildings), \$5,000.

BUILDING CLASSIFICATION

OWNERSHIP - The ownership of a building is classified at the time of approval as either "private sector" or "public sector" according to the expected ownership of the completed building.

FUNCTIONAL CLASSIFICATION OF BUILDINGS - A building is classified according to its intended major function. From the September quarter 1983, a building which is ancillary to other buildings or forms a part of a group of related buildings is classified to the function of the building and not to the function of the group as a whole. An example of this can be seen in the treatment of building work approved for a factory complex. In this case a detached administration building would be classified to Offices, a detached cafeteria building to Shops, while factory buildings would be classified to Factories. An exception to this rule is the treatment of group accommodation buildings where, for example, a student accommodation building on a university campus would be classified to Education.

Examples of the types of individual building jobs included under each main functional heading are shown in the following list:

- (a) House: Includes 'cottages', 'bungalows', detached caretakers'/managers' cottages, rectories;
- (b) Other Dwellings: Includes blocks of flats, home units, attached townhouses, villa units, terrace houses, semi-detached houses, maisonettes;
- (c) Hotels, etc.: Includes motels, hostels, boarding houses, guest houses, holiday apartment buildings;
- (d) Shops: Includes retail shops, restaurants, cafes, taverns, dry cleaners, laundromats, hair salons, shopping arcades;
- (e) Factories: Includes paper mills, oil refinery buildings, brickworks, foundries, power-houses, manufacturing laboratories, workshops as part of a manufacturing process;
- (f) Offices: Includes banks, post offices, council chambers, head and regional offices;
- (g) Other business premises: Includes warehouses, storage depots, service stations, transport depots and terminals, electricity substation buildings, pumping station buildings, telephone exchanges, mail sorting centres, broadcasting stations, film studios;
- (h) Educational: Includes schools, colleges, kindergartens, libraries, museums, art galleries, research and teaching laboratories, theological colleges;
- (i) Religious: Includes churches, chapels, temples;
- (j) Health: Includes hospitals, nursing homes, surgeries, clinics, medical centres;

(k) Entertainment and Recreational: Includes clubs, theatres, cinemas, public halls, gymnasiums, grandstands, squash courts, sports and recreation centres;

(l) Miscellaneous: Includes law courts, homes for the aged (where medical care is not provided as a normal service), orphanages, gaols, barracks, mine buildings, glasshouses, livestock sheds, shearing sheds, fruit and skin drying sheds, public toilets and ambulance, fire and police stations.

VALUATION OF BUILDING JOBS

The value series in this publication is derived from estimates reported on survey returns as follows:

(a) "Value of building approved, commenced, or under construction" represents the anticipated completion value based, where practicable, on estimated market or contract price of building jobs excluding the value of land and landscaping. Site preparation costs are included. Where jobs proceed over several quarters the anticipated completion value reported on the return for the first (commencement) quarter may be amended on returns for subsequent (under construction) quarters as the job nears completion;

(b) "Value of building completed" represents the actual completion value based, where practicable, on the market or contract price of building jobs including site preparation costs but excluding the value of land and landscaping;

(c) "Value of building work done during the period" represents the estimated value of building work actually carried out during the quarter on jobs which have commenced;

(d) "Value of building work yet to be done" represents the difference between the anticipated completion value and the estimated value of work done on building jobs up to the end of the period.

TABLE 3

**DESCRIPTION OF AREA CLASSIFICATIONS
AND
ABS CODE LISTS**

TABLE 3 - DESCRIPTION OF AREA CLASSIFICATIONS AND ABS CODE LISTS

This table is in three parts; the first part consists of definitions of the geographical areas used in AMIS together with a description of the coding used; the second part is a list of SLGA's in alphabetical order, grouped into the Statistical Divisions to which they relate, within States; the third part shows the relationship between SAC's and some other ABS area codes (these codes were translated, as appropriate, into SAC's for the purpose of preparing this publication).

TABLE 3 PART 1

Definitions of areas used in AMIS together with a description of the area coding (SAC).

STATISTICAL DIVISION

Statistical Divisions are designed to be relatively homogeneous regions characterised by identifiable social and economic links between the inhabitants and between the economic units within the region, under the unifying influence of one or more major towns or cities. Capital City Statistical Divisions are predominantly urban in character and the boundaries are delineated to contain the anticipated urban development of the capital cities (and associated Urban Centres) for a period of at least twenty years.

LEGAL LOCAL GOVERNMENT AREA (LGA)

Legal LGA's are the elective bodies responsible for municipal government constituted under the respective State Local Government Acts, or special Acts for Melbourne, Geelong, Brisbane, Hobart and Launceston, carrying out delegated functions within geographically limited areas of the States. Their number varies from time to time due to amalgamation and the growth of urban areas.

STATISTICAL LOCAL GOVERNMENT AREA (SLGA)

The term Statistical LGA refers to a spatial unit which covers the following set of unit types:

- i parts of particular whole legal LGA's (obtained by splitting the LGA's in accordance with the boundaries of certain other spatial units which cut across the LGAs, ie boundaries of Statistical Districts, Subdivisions, Divisions and Statistical Retail Areas);
- ii suburbs in the Brisbane Statistical Division;
- iii whole legal LGA's (where not subject to splitting as in (i))
- iv LGA equivalent areas in the NT and the ACT; and
- v unincorporated areas or broad subdivisions of these and off-shore areas not covered by the foregoing.

THE STANDARD AREA CODE (SAC)

The area coding used in AMIS is based on the SAC used for the ABS Economic Censuses and Surveys. The SAC has been modified by adding a 6th digit to cater for LLGA's that have ceased to exist, the totals of areas split into parts (not catered for with 5 digit codes) and the parts of LLGA's split by Statistical District boundaries (not catered for with 5 digit codes). SAC's used in AMIS are organised as follows:

<u>Character</u>	<u>Use</u>
1	State identifier
2-5	LGA or Statistical division
6	identifier only used for:
i	LLGA's that no longer exist, eg Colo S 103900
ii	totals of split areas, eg Waterford 302570 Waterford Part A 30208 Waterford Part B 30257
iii	parts of LLGA's split by statistical district boundaries, eg Murray Bridge DC 45246 Murray Bridge Part A 452460 Murray Bridge Part B 452461

<u>State Identifier</u>	<u>State</u>
1	New South Wales
2	Victoria
3	Queensland
4	South Australia
5	Western Australia
6	Tasmania
7	Northern Territory
8	Australian Capital

TABLE 3 PART 2

SLGA's in alphabetical order grouped into Statistical Divisions within States.

At the end of each state (where necessary) is a table of the LGAs that cross statistical boundaries together with the component SACs.

STATE/TERRITORY	PAGE

TABLE 3 PART 3

SLGA's together with the following ABS codes: SAC, Population Census, AMIS, SLGFS, AIDS, Vitals and Building.

When comparing data from various collections for different periods it should be remembered that the area codes used are subject to change from time to time. The appropriate codes for each period have been used when preparing this release.

The codes in this table are valid for the following periods:

Code	Period
SAC	year ended 30 June 1984
Population Census	as at 30 June 1981
AMIS	year ended 30 June 1980
SLGFS	year ended 30 June 1983
AIDS	as at 1 January 1983
Vitals	year ended 30 June 1983
Building	year ended 30 June 1984

State/Territory	Page
New South Wales	3.3.2
Victoria	3.3.8

Footnotes

- (a) These codes were used in AMIS prior to 1981.
- (b) This code is for the sum of the codes 30001 to 30181.
- (c) Not in existence at 30 June 1981.
- (d) These "split" SACs are combined with another SAC of the same name to form a legal LGA which is shown at the end of the table.
- (e) Included in Cook S.
- (f) Not in existence at 30 June 1976.

Footnotes

- (a) These codes were used in AMIS prior to 1981
 - (b) Not in existence at 30 June 1980
 - (c) Not in existence at 30 June 1981
 - (d) Not in existence at 30 June 1976
 - (e) New code from 31.12.84
 - (f) From i-7-85 prior codes were Strathalbyn DC 442642 April 76 - July 83.
Strathalbyn DC 442645 pre April 76.
Strathalbyn DC 442648 pre April 76.
 - (g) New code from August 1983
 - (h) Not in existence at July 1983.

TABLE 4

BOUNDARY CHANGES

TABLE 4 - BOUNDARY CHANGES

This table lists, for each State, the major boundary changes (those involving at least 100 persons) for LLGA's since 1.7.1967 and also changes of name that have occurred between 1.7.1967 and 31.1.1985 irrespective of whether there have been concurrent boundary changes or not.
